

2020

Case Study

in partnership with 

The success of this project was facilitated by multiple Rebate Bus products and services:

- Project incentive estimates
- Pre-approval application and submission for pre-inspection and COVID-19 desk audits.
- Application support with utility company, AEP Texas.
- Post application prep and submission for project inspection
- Incentive payment tracking and management

RebateBus

**Lighting Energy Usage
reduced by 56.1%**

**Rebate Impact was 13.4%
of project cost**

**Equivalent to removing the GHG
emissions of 9 passenger vehicles**

These two liquor stores in Abeline, Texas replaced 219 fixtures with more efficient lighting options. These replacements included changing compact fluorescent bulbs, fluorescent strip and troffers, metal halide wall packs to high-efficiency and money saving options including LED lamps, tubes and fixtures.
