

2020

Case Study

in partnership with  **PROSTAR**
ENERGY SOLUTIONS

The success of this project was facilitated by multiple Rebate Bus products and services:

- Project incentive estimates
- Pre-approval application and submission for pre-inspection and COVID-19 desk audits.
- Application support with utility company, Oncor.
- Post application prep and submission for project inspection
- Incentive payment tracking and management

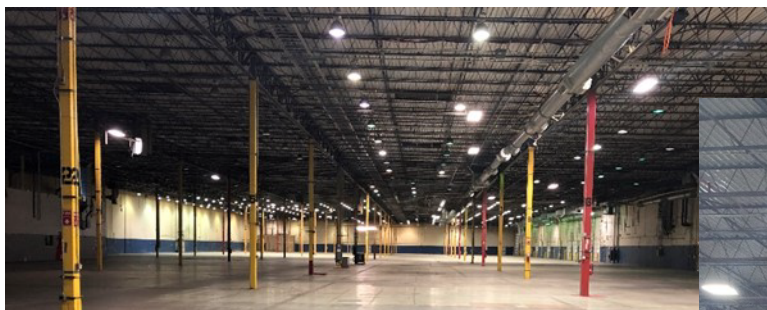

RebateBus

Lighting Energy Usage reduced by 80.5%

Rebate Impact was 49.3% of project cost

Equivalent to removing the GHG emissions of 75.7 passenger vehicles

This warehouse in Round Rock, Texas replaced over 450 fixtures with more efficient lighting options. These replacements included changing metal halide and T8 fluorescent high bays to high-efficiency and money saving options including 275 LED High Bays.

Actual before and after photos
of incentivised warehouse lighting.
